

SHANICE SMITH

✉ hello@shanice.dev  shanicesmith-swe  shanicesmith98  New York City, NY

EDUCATION

Master of Science in Data Science, *CUNY School of Professional Studies* 08/2026 – Present

Courses: Statistics and Probability for Data Analytics, Data Acquisition and Management

Bachelor of Technology, *CUNY New York City College of Technology* 08/2019 – 01/2022

Emerging Media Technology: Game Design and Interactive Media

Affiliations: ColorStack, Rewriting the Code, Girls Who Code, Gameheads, Society of Women Engineers

TECHNICAL SKILLS

Frontend: HTML/CSS (Sass), JavaScript, Vue.js, Tailwind, Bulma, PHP

Backend/Data: Python, SQL, Node.js, Java, R

Testing/Automation: BrowserStack, Selenium WebDriver, Mocha, BeautifulSoup

Tools: Figma, Git, GitHub, GitLab, Google Cloud Platform (BigQuery), XCode, Jira, Jupyter Notebook, Tableau, Claude Code

WORK EXPERIENCE

Software Engineer (Frontend), *ACLU* 02/2023 – Present | Remote

- Rebuilding legacy hard-coded page templates as reusable, mobile-first atomic components using PHP, Vue.js, and Tailwind CSS
- Engineering content and WordPress CMS enhancements in partnership with the CMS team to improve SEO and AEO performance, increasing the discoverability of web content across traditional and AI-powered search
- Developing and shipping weekly features for ACLU.org and 50+ affiliate sites, serving 1M+ monthly visitors, while fixing critical production bugs and implementing WCAG 2.1 AA accessibility standards
- Translating requirements from 10+ product, content, security, and design stakeholders into technical implementations, coordinating feature delivery across multiple projects, such as the National Brand Refresh and Know Your Rights redesigns

Software Engineer (Automation, Internal Tooling, Testing), *Twitter* 02/2022 – 01/2023 | Remote

- Optimized on-call experience for Machine Learning Engineers by refactoring DevOps dashboards in Python and developed a Scala prototype API for Notifications feature testing with Google Cloud Platform, Hadoop (Scalding, HDFS)
- Led 60% of the mobile release team's automation infrastructure expansion, streamlining biweekly iOS/Android release tracking, store metrics documentation, and stakeholder communication using Python, SQL, Jira REST API, Postman, and Jenkins
- Authored technical onboarding documentation, successfully ramping up 4+ engineers to the team's Java development systems

Software Engineer Intern (Automation, Internal Tooling, Testing), *Twitter* 08/2021 – 11/2021 | Remote

- Led shell script to Bazel migration for Quality Engineering automated testing infrastructure, achieving 30+ % reduction in required scripts through Starlark integration in Jenkins CI/CD pipeline and IntelliJ configuration setup

Software Engineer Intern (Internal Tooling), *Electronic Arts (EA Sports)* 05/2021 – 08/2021 | Remote

- Developed C# script to automate CSV data entry into the MySQL database, reducing manual input time for the database team
- Enhanced Madden's asset management tool with a C# feature to reduce backend RESTful design latency, achieving real-time data reflection in-game and accelerating development cycles for engineers and designers

QA Automation Intern, *The Walt Disney Company (Movies Anywhere)* 01/2021 – 05/2021 | Remote

- Built an automated front-end accessibility testing framework with JavaScript, Node.js, Mocha, and Selenium WebDriver, Sauce Labs, including axe, an accessibility testing API, to enhance Web Content Accessibility Guidelines (WCAG) compliance
- Integrated axe-core CLI tool with Bash scripts into the Jenkins CI/CD pipeline, automating 34% of accessibility test cases

Data Analyst Intern, *NYC Teachers' Retirement System (TRS)* 06/2020 – 08/2020 | Remote

- Analyzed 27M+ records using Tableau Prep Builder, Tableau Desktop, and MS SQL Server to identify unique user patterns and 200K+ migration errors during database modernization, presenting insights to stakeholders through data visualization

Data Analyst Intern, *NYC Department of Transportation* 10/2019 – 01/2020 | Manhattan, NY

- Analyzed 10+ years of traffic geospatial data with SQL and automated weekend advisory reporting with Python web scraping
